To Whom It May Concern,

I am writing to express my feedback about the experience that we had here at Wesley D. Tisdale School with Tricia Baker of Attitudes in Reverse, her volunteers and their dogs. On May 1st, our district hosted Mental Health Awareness Day. Tricia was invited to present a program to our second and third graders as part of the day's events. The program was well received by our students and staff alike. Her delivery, patience with our students, lessons and materials were age appropriate and engaging. The service dogs were gentle in their interactions with our students and had a positive disposition after a very long day.

I highly recommend Tricia Baker for this age group. She was developmentally appropriate and knowledgeable about subjects from stress management, coping strategies for children and spreading kindness to one another. Students left the program feeling positive, empowered and comfortable utilizing the strategies she equipped them with when encountering challenges in their own lives.

Should you have any questions regarding the Attitudes in Reverse Program, you are welcome to contact me at any time.

Respectfully,

Gina G. Aliano
